Glazing survey form

- Do you have glass and glazing in your property which is below 2metres from floor level?
- Do you have any existing glass which is already cracked or broken and needs replacing?
- Do you already have clear safety window film applied to your glass which is date stamped?
- If yes, is the date more than 5 years old?

If the answer to any of these is yes, contact us to arrange a free glazing survey with cost effective solution.

Applied Products can undertake an assessment of your glazing checking the compliance of each against:

- ✓ Protection against impact
- ✓ Glazing type
- ✓ Glazing thickness
- ✓ Manifestation on glazing
- ✓ Location and reference number

From the data recorded an assessment of the condition and risk for each element is determined by our software, derived from calculations made against the size, thickness, glass type, location, occupants and height from floor.

The types of glazing requiring assessment include:

- ✓ Windows, skylights, vision panels in doors and overpanels
- ✓ Glass panels and screens
- ✓ Glass tables, desks, picture frames and similar surfaces
- ✓ Glazed conservatories
- ✓ Shower doors, mirrors and panels
